Detailed Action

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 does not clearly describe what is meant by the phrase "to the pyrolysis furnace gas cooler(s) and separating unit(s) as well as solid-product sump are joined by means of gas collector conduit provide with a gas meter and a gas flow control valve and inserting a circulation ventilator and a suction control gas valve are joined to the outlet gas conduit of the separating unit(s), furthermore consists of a by-pass gas conduit provided with a gas-flow control valve arranged after the circulation ventilator, the by-pass gas conduit is joined to the heating apparatus and the cell cavity of the pyrolysis furnace provided with a temperature detector as well as pressure gauge/pressure transmitter and the latter is connected to the controlling means of the suction control valve" How is the gas collector joined to pyrolysis furnace gas cooler(s) and separating unit(s) as well as solid-product sump? Examiner assumes Applicant refers to any piping system directly or indirectly connected. Where are the circulation ventilator and suction control valve inserted? Where is the circulation ventilator located? How is the bypass conduit joined to the heating apparatus? How is the bypass conduit structurally integrated with the outlet gas conduit and separating unit? Where is the gas cooler located? Examiner interprets the

Art Unit: 1764

gas cooler as a heat exchanger. What does latter refer to? How is the pressure gauge connected to the suction control valve? Examiner assumes that the pressure gauge can be connected directly or indirectly. Examiner recommends that Applicant completely rewrite claim 1 in order to facilitate examination.
